PROFESSIONAL SUMMARY

Software Engineering student graduating in 2026 with experience developing and deploying full-stack applications using Java Spring Boot, React, MySQL and Docker. Strong focus on backend development, REST APIs, database design and Linux deployments. Seeking an entry-level Software Engineer, Backend Developer or Full-Stack Developer role.

TECHNICAL SKILLS

Backend: Java, Spring Boot, REST APIs, JWT Authentication, MVC Architecture

Frontend: React, JavaScript, TypeScript, HTML, CSS

Databases: MySQL, SQL Server, SQLite

DevOps & Tools: Docker, Linux, Nginx, Git, GitHub, Maven, npm

Testing: JUnit

Languages: Spanish (Native), English (B2)

EDUCATION

Bachelor's Degree in Software Engineering

Universidad Latina de Costa Rica

Expected Graduation: December 2026

High School Diploma

Westland High School

Heredia, Costa Rica

Dec 2022

WORK EXPERIENCE

IT Systems Developer | Herrera Arias Medical Office & Concrebox_PTY | Dec 2023 – May 2025

- Designed and developed internal management systems for appointment scheduling and inventory control.
- Automated administrative workflows reducing manual administrative tasks by 40%.
- Structured and maintained databases supporting over 1,000 business records and improving data reliability.

Freelance Full-Stack Software Developer | Self-Employed | Oct 2024 – Present

- Developed and deployed 3+ full-stack business applications using Java Spring Boot, React and MySQL.
- Designed relational databases and implemented RBAC authentication.
- Implemented inventory, sales and reporting modules handling 1,000+ records.
- Deployed applications using Docker, Linux VPS and Nginx.
- Translated client operational needs into technical software solutions.
- Developed cross-platform mobile applications using Flutter when required.

PROJECTS

Inventory Management System (Private Client)

Java | Spring Boot | React (PWA) | MySQL | Docker | Nginx | Linux VPS

- Developed a production-ready inventory and sales management platform using Spring Boot, React and MySQL.
- Designed REST APIs with RBAC authentication.
- Implemented multi-warehouse stock tracking and reporting dashboards.
- Deployed using Docker, Linux VPS, Nginx and SSL.

Appointment Scheduling System

Java | Spring Boot | MySQL

- Built secure scheduling and administrative management system.
- Implemented authentication and relational database design.

E-Commerce Website (Supplements Brand)

React | REST API | MySQL

- Developed responsive e-commerce platform with product catalog, shopping cart and sales management features.
- Built responsive UI optimized for mobile and desktop.
